**Gradient analyses of forests ground vegetation and
its relationships to environmental variables in five
subtropical forest areas, S and SW China**

2008

is owned by the Natural History Museum, University of Oslo, and edited by its botanical departments.

SOMMERFELTIA is named in honour of the eminent Norwegian botanist and clergyman Søren Christian Sommerfelt (1794-1838). The generic name *Sommerfeltia* has been used in (1) the lichens by Flörke 1827, now *Solorina*, (2) Fabaceae by Schumacher 1827, now *Drepanocarpus*, and (3) Asteraceae by Lessing 1832, nom. cons.

SOMMERFELTIA is a series of monographs in plant taxonomy, phytogeography, phytosociology, plant ecology, plant morphology, and evolutionary botany. Authors of Norwegian institutions other than the Natural History Museum, University of Oslo pay the cost of technical editing plus NOK 50, other authors pay the cost of technical editing plus NOK 100 per printed page.

SOMMERFELTIA appears at irregular intervals, normally one article per volume.

Editor: Rune Halvorsen.

Editor of this volume: Klaus Høiland.

Technical editing by Jan Wesenberg.

Editorial Board: Scientific staff of the botanical departments at the Natural History Museum,
University of Oslo.

Address: SOMMERFELTIA, Natural History Museum, University of Oslo, P.O. Box 1172 Blindern,
NO-0318 Oslo, Norway.

Order: On a standing order (payment on receipt of each volume) SOMMERFELTIA is supplied at
30 % discount.

Separate volumes are supplied at the prices indicated on pages inserted before the back cover.

Copyright: The author(s) & Natural History Museum, University of Oslo.

INSTRUCTIONS TO AUTHORS:

SOMMERFELTIA accepts scientific papers of 32 printed pages or more, in English. The abstract should not exceed 300 words. The author is responsible for ensuring that the English is linguistically correct.

Manuscripts to SOMMERFELTIA must not have been published or accepted for publication elsewhere.

Manuscripts are subjected to peer reviewing by at least two reviewers, before acceptance or rejection is decided.

Authors of planned contributions to SOMMERFELTIA are recommended to contact the editor early in the writing process: manuscripts should, as far as possible, be prepared by the author to fit the textual conventions of the series, but with minimal formatting. The hierarchy of headings may include four levels. Further instructions may be obtained from the editor. The manuscript should be submitted electronically.

Figures (incl. line drawings) should be submitted as separate high resolution graphic files and should fit the type area. Legends to figures should be included as a separate file. Tables (including headings), prepared by the table function of standard word processing software, should be enclosed as a separate file. Tables placed at right angles to normal text should be 20.3 cm broad and no more than 14.0 cm high. Tables divided on more pages can be accepted; on the second and later pages the table heading should be Tab. x (continued).

Figures and tables should be numbered separately and consecutively with Arabic numerals. Digital photographs may be accepted after agreement with the editor. Coloured illustrations are accepted when extra costs are paid for by the author. Taxonomic keys should have right margins and be based on dichotomies. References should be written according to current practice in SOMMERFELTIA. SOMMERFELTIA prefers abbreviations of titles in accordance with the World List of Scientific Periodicals. Recent issues of SOMMERFELTIA (Vol. 32) should be consulted for details of layout.

The author(s) are supplied with ten copies free of charge. Additional copies may be ordered at subscription cost.
